PROFESSIONAL SUMMARY

B.Tech Computer Science student (CGPA 8.46/10) with hands-on experience in Generative AI, Agentic AI, full-stack development, OCR, REST APIs, databases and data analytics. Completed a 5-month AI Developer internship building LLM-powered and OCR-based automation applications, and built and deployed OmniRoot, an agentic AIOps platform. Fast learner seeking to contribute to a software development team.

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai — **Aug 2023 – Jun 2027**
B.Tech – Computer Science and Engineering | **CGPA: 8.46/10**

FIITJEE Junior College, Visakhapatnam | MPC | **77.4%** — Jun 2021 – Mar 2023

Tirumala E.M. High School | **100%** — Aug 2020 – Apr 2021

SKILLS

Programming	Python, Java, C, SQL
Web Development	HTML, CSS, REST APIs, FastAPI
Databases	MySQL, PostgreSQL
AI & Automation	LLMs, Prompt Engineering, OpenAI API, OCR, n8n
Tools & Platforms	Git, GitHub, Docker, AWS (Basics)

EXPERIENCE

Agentic AI Developer Intern — June 06 2025 – Sep 30 2025
Modern Agriculture Technology Innovation Center (MATIC) — Chennai
MADeIT-Incubated Startup at IIITDM Kancheepuram | Full-Time, Hybrid

- Identified fragmented, manual workflows across startup operations by working directly with founders to uncover root causes, then prioritized the highest-impact automation opportunities.
- Translated ambiguous operational problems into structured product requirements, and designed agentic AI workflows using LLMs, LangGraph, LangChain and full-stack technologies.
- Built and scaled Assist Pro, an AI-powered automation platform, reducing manual effort by over 75% across startup operations.

PROJECTS

GenAI-Powered Task Management and Expense Analytics Platform
Python · LLM · Prompt Engineering · REST API · SQL · OCR · HTML

- Built AI-powered applications for employee task assignment, workflow automation, project tracking, approvals, role-based access control and real-time monitoring.
- Developed a conversational AI assistant to process natural-language requests, manage employee and project data, automate workflows and generate reports.
- Built an OCR-based invoice-processing system to extract invoice data, categorize transactions and generate dashboards for income, expenses, profit/loss, vendor analytics and spending trends.

IoT Smart Agriculture System
Python · Raspberry Pi · REST API · Cloud

- Developed an IoT platform monitoring soil moisture, temperature, humidity, rainfall, water level, NPK nutrients and light intensity.
- Integrated Raspberry Pi with sensors, cloud dashboards, automated irrigation control, real-time alerts and remote monitoring for data-driven crop management and efficient water usage.

OmniRoot Agentic AI – Autonomous Infrastructure Intelligence Platform
OpenAI API · n8n · SQL · Docker
Live Demo: https://omniroot-agentic-ai.vercel.app **GitHub Link:** https://github.com/Vamsi112-max/OmniRoot-AI

- Developed an AI-assisted AIOps platform for infrastructure monitoring, incident detection, root-cause analysis, API debugging, cloud cost analysis, security monitoring and remediation support.
- Designed an architecture with 5 specialized AI agents, 8 intelligence layers and an 18-node workflow for incident analysis, alert prioritization, governance reporting and remediation.

AtomSphere Nexus – Goal Intelligence & Performance Tracking SaaS Platform
Live Demo: https://atom-sphere-nexus.vercel.app **GitHub Link:** https://github.com/Vamsi112-max/AtomSphere-Nexus

ACHIEVEMENTS & LEADERSHIP

- **2nd Place** – Smart India Hackathon (University Level)
- **3rd Place** – IIITDM Innovation Bootcamp Cybersecurity Challenge
- Participated in Amazon HackOn 6.0, AtomQuest 2026, Google Gemini Write-off, Agentic AI Hackathon, IndustrIAI Hackathon, Aurigo, Infosys and Smart India Hackathon.
- **Chief of Industry, Alumni & Partnership and Registration** – Yantriksha X Hub, Vel Tech University (1000 students).
- **Creative Design & Visuals Head** – Just Between Us Town Hall
